# **INSIDER TRUST**

PAUL FITZPATRICK

NIKKI ABRAMS

"We don't know THEM ALL, but we owe THEM ALL." THE

# Disclaimer

We are not representing DCSA or the requirements of Insider Threat Reporting

 Our Insider Threat program has not been characterized as industry best practices

We are only sharing what we have seen work well within our team

# Disclaimer

## What is required by the DoD?

- National Industrial Security Program
  32 CRF Part 117
- Insider Threat Program Senior Officials
  - Cleared to the level of the company
- Cleared Individuals
  - Indicators submitted to DoD
  - 13 Adjudicative Guidelines provided by DoD

## What is an Insider Threat?

- An incident by an individual who has or once had authorized access to classified or sensitive information, a facility, network, person, or resource of your company.
- The individual wittingly or unwittingly committed an act in contravention of law or policy which resulted in or might result in harm through the loss or degradation of government or company information, resources, or capabilities. This also includes destructive acts, which may cause physical harm to another in the workplace.

## What Is the Threat?

- What is a threat from the inside?
  - A threat to an organization's security or data that comes from within
  - Could be an employee, former employee, contractor or business associate
  - Threat may involve fraud, theft of confidential or commercially valuable information
  - Theft of IP, or sabotage of computer systems
  - The threat may also be in the form of violence
- Why is insider threat more of a concern now?
  - Increased number of people with access to sensitive information
  - Ease of transferring information electronically
  - Growing demand for information from hostile sources
  - Importance of unclassified information
  - Increased workplace violence and use of weapons

THIS MAN WAS THOROUGHLLY VETTED BEFORE BEING ALLOWED INTO THE US YOU MAY REMEMBER HIM AS: NIDAL HASAN THE FORT HOOD SHOOTER

Does not contain Technical Data. //Not Tech Data/US/FOB OFFICIAL USE ONLY

# What do insider indicators show?

#### What to look for – no easy answer

- Unethical or criminal behavior
- Dissatisfaction with the Government or the Company
- Indicators of alcohol or drug dependencies
- Unexplained financial affluence or difficulties
- Misuse of IT technology
- Unexplainable unusual or odd working hours
- Seeking information beyond job requirements

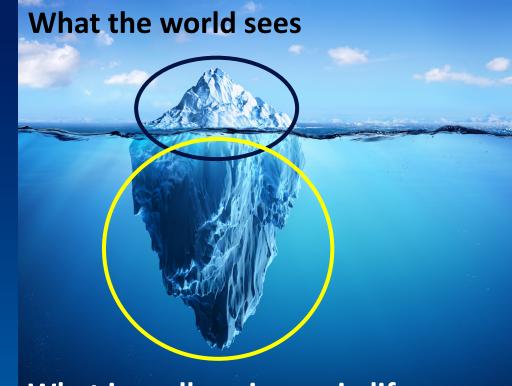

#### Sometimes subtle indicators are all we have, to know someone needs help

#### Why is Insider Threat Detection so Hard

- People don't display their emotions in public
- People don't want to call attention to themselves
- People are afraid of the consequences
- Indicators aren't obvious
- Co-workers like to explain indicators away
- Co-workers don't want to snitch
- Managers don't want to get a valued employee fired

What is really going on in life

#### Small indicators maybe all we have

Does not contain Technical Data. //Not\_Tech\_Data/US/FOR\_OFFICIAL USE ONL

#### Myths

Employee will lose their clearance

Reports are fully vetted by DoD, they apply the whole person concept to any report The Employee will be fired

Mercury will do a full investigation, we want to keep valued employees

Nothing will get done

Our program is about helping people get back on track

What if I am wrong will I get in trouble for false reports

Your concerns are important all reports are fully investigated

Everyone will know

All reports are strictly private

Marrian Webster Dictionary – Myth: an unfounded or false notion

#### **Case Study**

- Massachusetts-based American Superconductor AMSC
  - Partnered with Chinese company Sinovel to harness wind power
  - AMSC supplied software; Sinovel provided hardware
  - Sinovel began turning away deliveries early in the contract
  - Refused to pay \$100 million owed
  - Cancelled \$800 million in future orders ready to ship
  - Sinovel got access to AMSC intellectual property (Source Code)
- Dejan Karabasevic AMSC employee
  - Created software for Sinovel using AMSC source code
  - One of only three engineers with access to AMSC source code
  - One of the few engineers to travel to Sinovel (China) often

Does not contain Technical Data. //Not Tech Data/US/FOB OFFICIAL USE ONLY

# How did this happen?

- What was known about Karabasevic
  - Having personal problems, including financial difficulties
  - Recently demoted at work
  - Narcissistic personality
  - He was embedded with Sinovel in China

#### Sinovel

- Promised Karabasevic a 5-year, \$1.7 million contract
- Obtained and used stolen source code
- Stopped buying from AMSC
- AMSC
  - AMSC stock fell >50% within a month, ultimately losing >95% of its value
  - Revenue fell by >80%
  - AMSC let go >60 % of its work force

## Karabasevic: All the warning signs were there...

- They knew he was demoted, though the company still embedded him with a potential hostile client.
- John W. Vandreuil, the U.S. attorney in Madison, Wisc., called Sinovel's attack on American Superconductor, "nothing short of attempted corporate homicide".

#### If You See Something, Say Something

# So, what has Mercury done to assess Insider Trust Indicators?

- Established an Insider Trust team between HR, IT Security and Corporate Security
  - Builds team dynamic while sharing trust, knowledge, resources and meeting regularly
  - Employee are the cornerstone of Mercury Secured Program
- Developed/launched repository to report employee indicators
  - Identified 18 behaviors to consider for reporting
  - Branded as "The Shield"
  - HR, IT Security and Security input data into The Shield
    - Site access to site information only; protect business need to know
    - Threat level guidelines/assessment
    - Developed The Shield training program
  - Established Super User Group

#### **Roles and Responsibilities**

- Site Management
- Human Resources
- IT Security
- Facility Security Officer
- First Line Management
- Insider Threat Senior Program Official

#### If you See Something Say Something to your FSO or HRBP

Does not contain Technical Data. //Not Tech Data/US/FOR OFFICIAL USE ONLY

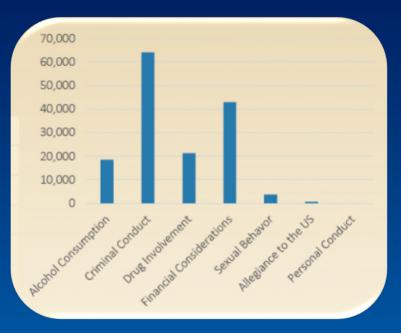

#### **Insider Trust Indicators**

#### **13 ADJUDICATIVE GUIDELINES**

- Allegiance to the United States
- Foreign Influence
- Foreign Preference
- Sexual Behavior
- Personal Conduct
- Financial Considerations
- Alcohol Consumption
- Drug Involvement
- Psychological Considerations
- Criminal Conduct
- Handling protected Information
- Outside Activities
- Use of Information Technology

#### MERCURY ADDED INDICATORS

- Performance Improvement Plan
- Resignation
- Identified on Reduction in Force (RIF) list
- Aggressive or Agitated Behavior
- Attempts to Access Restricted Data

Vetting Risk Operations Center (VROC)

# **The Shield**

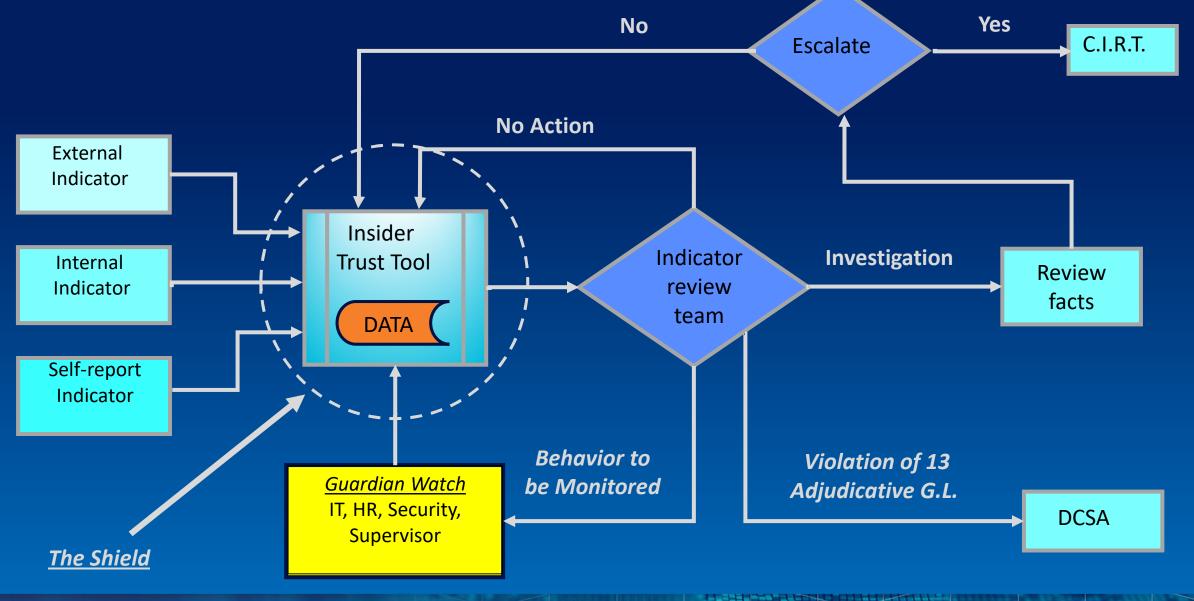

- It is a homegrown Program/Tool
- Core Divisions which make up the Super User Team:
  - HR
  - IT Security
  - Corporate Security

 Within the first six months of The Shield being active over 200 reports were reviewed
